

A large tortoise, likely a Galapagos tortoise, is seen from a high angle through a wire mesh enclosure. The tortoise is resting on a thick bed of light-colored wood chips. Its shell is dark brown with prominent yellowish-gold scutes. Its head and front legs are extended forward. A small white arrow points to a small white mark on the wood chips near the tortoise's front leg. The background is a solid blue wall.

Déier	Schildkröt (Weiblech)	Gréisst	12cm
Gewiicht	0.23kg		
Faarf	Schwaarz / Giel / Brong
